## EQUITY STYLE BOX

INVESTMENT STYLE			MARKET CAPITALIZATION
Value	Blend	Growth	
			Large
			Medium
			Small

Placement within the Morningstar Equity Style Box™ is based on two variables: relative median market capitalization and relative price valuations (price-to-book and price-to-earnings) of the Fund's portfolio holdings. These numbers are drawn from the Fund's portfolio holdings figures most recently entered into Morningstar's database and the corresponding market conditions.

## INVESTMENT OBJECTIVE

Seeks long-term capital appreciation.

**Figures quoted represent past performance, which is no guarantee of future results.** Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Current month-end performance is available at the Funds' Web site, [www.wellsfargo.com/advantagefunds](http://www.wellsfargo.com/advantagefunds).

Administrator and Institutional Class shares are sold without a front-end sales charge or contingent deferred sales charge.

The adviser has committed, through 11/30/2010, to waive fees and/or reimburse expenses to maintain the Fund's net expense ratio at 1.00% for Administrator Class shares, and 0.80% for Institutional Class shares. Without these reductions, the Fund's returns would have been lower. The Fund's gross expense ratio is 1.16% for Administrator Class shares, and 0.89% for Institutional Class shares.

Please keep in mind that high double-digit returns were primarily achieved during favorable market conditions. You should not expect that such favorable returns can be consistently achieved. A Fund's performance, especially for very short time periods, should not be the sole factor in making your investment decision.

## GROWTH OF \$10,000 & ANNUAL RETURNS (ADMINISTRATOR SHARES)<sup>1</sup>

Assumes reinvestment of dividends and capital gains.

## SECTOR DISTRIBUTION

Sector distribution is a breakdown of the Fund's investments based on the S&P Global Industry Classification Standard (GICS), a breakdown of market sectors used by Standard & Poor's. Sector distributions are subject to change and may have changed since the date specified.

## INVESTMENT STRATEGY

- We invest principally in the equity securities of approximately 30 to 40 companies that we believe offer the potential for capital growth. We may also invest in equity securities of foreign issuers through ADRs and similar investments. We select equity securities of companies of any size. Because we retain the flexibility to invest in a relatively small number of stocks, the Fund is also considered to be non-diversified.

**Stock fund values fluctuate in response to the activities of individual companies and general market and economic conditions. The use of derivatives may reduce returns and/or increase volatility. Active trading results in increased turnover and trading expenses and may generate higher short-term capital gains. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This Fund is exposed to foreign investment risk, and nondiversification risk. Consult the Fund's prospectus for additional information on these and other risks.**

(2) The Lipper Large-Cap Growth Funds Average is an average of funds that invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) of greater than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. These funds will typically have an above-average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value compared to the S&P 500 Index. The total return of the Lipper Average does not include the effect of sales charges. You cannot invest directly in a Lipper Average.

(3) The Russell 1000® Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. You cannot invest directly in an index.
